The Radical Imagination Doctor Alex Khasnabish 2014-06-12 The idea of the imagination is as evocative as it is elusive. Not only does the imagination allow us to project ourselves beyond our own immediate space and time, it also allows us to envision the future, as individuals and as collectives. The radical imagination, then, is that spark of difference, desire and discontent that can be fanned into the flames of social change. Yet what precisely is the imagination and what might make it 'radical'? How can it be fostered and cultivated? How can it be studied and what are the possibilities and risks of doing so? This book seeks to answer these questions at a crucial time. As we enter into a new cycle of struggles marked by a worldwide crisis of social reproduction, scholar-activists Max Haiven and Alex Khasnabish explore the processes and possibilities for cultivating the radical imagination in dark times. A lively and crucial intervention in radical politics, social research and social change, and the collective visions and cultures that inspire them.

No-Win War Zahid Hussain 2021-08-03 This book explores the post-9/11 relations between the US and Pakistan. The growing divergence between Washington and Islamabad has taken an already uneasy alliance to a point of estrangement. Yet, a complete breakup is not an option. The underlying cause of the tension, within the partnership the two had entered on 13 September 2001, has never been fully understood. What is rarely discussed is how Pakistan's decision to ally itself with the US pushed the country into a war with itself; the cost of Pakistan's tight roping between alignment with the US and old links with the Afghan Taliban; and its long-term implications for the region and global security. This book elucidates implications for Afghanistan in the so-called war on terror while revealing US and Pakistan's foreign policy initiatives. The author explores all this through little known facts and through the players involved in this cloak and dagger game. The book tells the story behind the headlines: how equivocal is ISI's break with the Afghan Taliban fighting the coalition forces in Afghanistan; the shootout in Lahore involving a CIA agent; and the killing of Osama bin Laden.

Santa's Husband Daniel Kibblesmith 2017-10-10 Offering a fresh twist on Kris Kringle, a clever yet heartfelt book that tells the story of a black Santa, his white husband, and their life in the North Pole. Everyone knows that Santa Claus is jolly, but in Santa's Husband, this cherished symbol of the holiday season is also black and gay, and married to an equally cheery man. In this witty and sweet illustrated Christmas tale, humor writer Daniel Kibblesmith introduces us to Mr. and Mrs. Claus, and gives us a glimpse of their lives together. We see the Clauses sitting by the fire at their cozy North Pole home, vacationing at the beach, having an occasional disagreement, celebrating their wedding day, and comforting each other when some loudmouth people on television angrily dispute Santa's appearance and lifestyle. In the weeks before Christmas, Santa's husband helps with all the pre-Christmas work, from double-checking lists, to feeding the reindeer (organic gluten-free grains, of course), to negotiating labor disputes with the restive workshop elves. At the height of toy-making season, he even fills in for his busy hubby at the mall to ensure every child can meet the Big Guy in the red suit, and give him their wish list. As this charming book reminds us, Santa Claus can come in all shapes and colors and sizes—just like the children and families he visits all over the world each Christmas eve. Featuring beautiful watercolor pictures drawn by artist AP Quach, Santa's Husband is a delightful gift for readers of all ages.

Brighton at War 1939-45 Douglas d'Enno 2021-12-31 Long before war was declared on 3 September 1939, Brighton had steadily and carefully prepared for the coming conflict by building shelters, organising defence and rescue services, and providing the population with advice of its own or from government sources. These precautions stood the town in good stead when the first bombs fell on it in mid-1940 and during the many subsequent attacks. The resort did not, admittedly, suffer as grievously as some others on the South Coast, yet civilian casualties totalled nearly 1,000, of whom over 200 were killed, 357 were seriously injured and 433 slightly injured. This is not the first book to reveal the toll of the bombs locally, but it is the first to describe, in parallel, day-to-day events and societal responses during the nearly six years of conflict. As elsewhere, restrictions often made life arduous for residents. Yet despite the hardship, the town's citizens even marshalled sufficient resources to 'adopt' two battalions and generously saved towards assisting with other wartime causes, such as help to our ally, Russia. The hospitality trade and resort-related services suffered greatly during the periods when the defence ban on entering the town was enforced. In many respects, however, life went on largely as before, particularly in the spheres of entertainment, leisure and some sports. Douglas d'Enno, an authority on the history of Brighton and environs, shows in meticulous detail, in absorbing text and numerous pictures, how life in wartime Brighton was a struggle for many, but never dull.

On Escalation Herman Kahn 2017-07-12 In this widely discussed and influential book, Herman Kahn probes the dynamics of escalation and demonstrates how the intensification of conflict can be depicted by means of a definite escalation ladder, ascent of which brings opponents closer to all-out war. At each rung of the ladder, before the climb proceeds, decisions must be made based on numerous choices. Some are clear and obvious, others obscure, but the options are always there. Thermonuclear annihilation, says Kahn, is unlikely to come through accident; but nations may elect to climb the ladder to extinction. The basic material for the book was developed in briefings delivered by Kahn to military and civilian experts and revised in the light of his findings of a trip to Vietnam in the 1960s. In On Escalation he states the facts squarely. He asks the reader to face unemotionally the terrors of a world fully capable of suicide and to consider carefully the alternatives to such a path. In the never-never land of nuclear warfare, where nuclear incredulity is pervasive and paralyzing to the imagination even for the professional analyst, salient details of possible scenarios for the outbreak of war, and even more for war fighting, are largely unexplored or even unnoticed. For scenarios in which war is terminated, the issues and possibilities of which are almost completely unstudied, the situation is even worse. Kahn's discussion throws light on the terrain and gives the individual a sense of the range of possibilities and complexities involved and are useful.

Learn to ask better, more helpful questions of your work so that you can create stronger and more powerful photographs.

Photographers often look at an image—one they've either already created or are in the process of making—and ask themselves a simple question: "Is this a good photograph?" It's an understandable question, but it's really not very helpful. How are you supposed to answer that? What does "good" even mean? Is it the same for everyone?

What if you were equipped to ask better, more constructive questions of your work so that you could think more intentionally and creatively, and in doing so, bring more specific action and vision to the act of creating photographs? What if asking stronger questions allowed you to establish a more effective approach to your image-making? In *The Heart of the Photograph: 100 Questions for Making Stronger, More Expressive Photographs*, photographer and author David duChemin helps you learn to ask better questions of your work in order to craft more successful photographs—photographs that express and connect, photographs that are strong and, above all, photographs that are truly yours.

From the big-picture questions—What do I want this image to accomplish?—to the more detail-oriented questions that help you get there—What is the light doing? Where do the lines lead? What can I do about it?—David walks you through his thought process so that you can establish your own. Along the way, he discusses the building blocks from which compelling photographs are made, such as gesture, balance, scale, contrast, perspective, story, memory, symbolism, and much more. *The Heart of the Photograph* is not a theoretical book. It is a practical and useful book that equips you to think more intentionally as a photographer and empowers you to ask more helpful questions of you and your work, so that you can produce images that are not only better than "good," but as powerful and authentic as you hope them to be.

Trading Binary Options Abe Cofnas 2016-06-22 A clear and practical guide to using binary options to speculate, hedge, and trade Trading Binary Options is a strategic primer on effectively navigating this fast-growing segment. With clear

explanations and a practical perspective, this authoritative guide shows you how binaries work, the strategies that bring out their strengths, how to integrate them into your current strategies, and much more. This updated second edition includes new coverage of Cantor-Fitzgerald binaries, New York Stock Exchange binaries, and how to use binaries to hedge trading, along with expert insight on the markets in which binaries are available. Independent traders and investors will find useful guidance on speculating on price movements or hedging their stock portfolios using these simple, less complex options with potentially substantial impact. Binary options provide either a fixed payout or nothing at all. While it sounds simple enough, using them effectively requires a more nuanced understanding of how, where, and why they work. This book provides the critical knowledge you need to utilize binary options to optimal effect. Learn hedging and trading strategies specific to binaries Choose the markets with best liquidity and lowest expenses Find the right broker for your particular binary options strategy Utilize binaries in conjunction with other strategies Popular in the over-the-counter market, binary options are frequently used to hedge or speculate on commodities, currencies, interest rates, and stock indices. They have become available to retail traders through the Chicago Board Options Exchange and the American Stock Exchange, as well as various online platforms, allowing you the opportunity to add yet another tool to your investing arsenal. Trading Binary Options is the essential resource for traders seeking clear guidance on these appealing options.

Hearing Happiness Jaipreet Virdi 2020-08-31 Weaving together lyrical history and personal memoir, Virdi powerfully examines society's—and her own—perception of life as a deaf person in America. At the age of four, Jaipreet Virdi's world went silent. A severe case of meningitis left her alive but deaf, suddenly treated differently by everyone. Her deafness downplayed by society and doctors, she struggled to “pass” as hearing for most of her life. Countless cures, treatments, and technologies led to dead ends. Never quite deaf enough for the Deaf community or quite hearing enough for the “normal” majority, Virdi was stuck in aural limbo for years. It wasn't until her thirties, exasperated by problems with new digital hearing aids, that she began to actively assert her deafness and reexamine society's—and her own—perception of life as a deaf person in America. Through lyrical history and personal memoir, *Hearing Happiness* raises pivotal questions about deafness in American society and the endless quest for a cure. Taking us from the 1860s up to the present, Virdi combs archives and museums in order to understand the long history of curious cures: ear trumpets, violet ray apparatuses, vibrating massagers, electrotherapy machines, airplane diving, bloodletting, skull hammering, and many more. Hundreds of procedures and products have promised grand miracles but always failed to deliver a universal cure—a harmful legacy that is still present in contemporary biomedicine. Weaving Virdi's own experiences together with her exploration into the fascinating history of deafness cures, *Hearing Happiness* is a powerful story that America needs to hear. **The End of Gout** Shelly Manning 2020-02-07 Gout used to be considered the "disease of kings," but because people are living more sedentary lifestyles, eating rich, creamy, meaty meals, and consuming alcohol on a more frequent basis, gout is being diagnosed more frequently. Gout is defined and explained thoroughly. A treatment plan is given that includes lifestyle changes and meal plans, what foods to avoid, how to reduce stress and an exercise plan that has low impact on the joints. Everything about gout is explained, examples are provided to give an alternative treatment plan that a regular doctor may or may not provide.

We're Not Broken Eric Garcia 2021 "This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In *We're Not Broken*, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

Tracking the Wild Coomba Robert Cocuzzo 2016-07-12 "Doug Coombs had a huge impact on my life; much of my overall approach to mountains comes from his example. I am so grateful that, thanks to author Rob Cocuzzo, I now have the complete story of what influenced one of my biggest heroes." - Jeremy Jones, snowboarding legend "In the 1980s, I was lucky enough to be part of the Bozeman gang of ex-ski racers in one of the crucibles of the American steep skiing scene. Robert Cocuzzo accurately captures the amazing Doug and Emily Coombs that I knew then and the myriad of Coombs ski stories." - Bruce Tremper, avalanche expert and author of *Staying Alive in Avalanche Terrain* "Doug Coombs was an inspiration to me and so many others on and off the mountain. Now, here is an insightful look at the life of a legend." Jimmy Chin, climber-photographer • A thrilling biography of renowned extreme skiing pioneer Doug Coombs Arguably the greatest extreme skier to ever live, Doug Coombs pioneered hundreds of first descents down the biggest, steepest, most dangerous mountains in the world—from the Grand Teton “Otter Body” in Jackson Hole, to Mount Vinson, the highest point in Antarctica, to far-flung drops such as Wyatt Peak in Kyrgyzstan. He graced magazine covers, wowed moviegoers, became the face of top ski companies, and ascended as the king of big mountain extreme skiing.

Men, Women, and Chain Saws Carol J. Clover 2015-05-26 Examining the popularity of low-budget cinema, particularly slasher, occult, and rape-revenge films, the author argues that, while such films have been traditionally understood as offering only sadistic pleasure to their mostly male audiences, in actuality they align spectators not with the male tormentor but with the females being tormented—particularly the slasher movie's "final girls"—who endure fear and degradation before rising to save themselves.--Adapted from publisher description.

Fences and Ma Rainey's Black Bottom August Wilson 2020-02-27 Two stunning, intensely powerful modern classics about race in 20th century America from the legendary Pulitzer Prize and Tony Award-winning playwright August Wilson. In *Ma Rainey's Black Bottom*, the great blues diva Ma Rainey is due to arrive at a run-down Chicago recording studio with her entourage to cut new sides of old favourites. Waiting for her are the black musicians in her band - and the white owners of the record company. A tense, searing account of racism in jazz-era America that the New Yorker called 'a genuine work of art'. *Fences* centres on Troy Maxson, a garbage collector, an embittered former baseball player and a proud, dominating father, in 1950s Pittsburgh. When college athletic recruiters scout his teenage son, Troy struggles against his young son's ambition, his wife, who he understands less and less, and his own frustrated dreams.

Sittin' In Jeff Gold 2020-11-17 A rare collection of more than 200 full-color and black-and-white souvenir photographs and memorabilia that bring to life the renowned jazz nightclubs of the 1940s and 1950s, compiled by Grammy Award-winning record executive and music historian Jeff Gold and featuring exclusive interviews with Quincy Jones, Sonny Rollins, Robin Givhan, Jason Moran, and Dan Morgenstern. In the two decades before the Civil Rights movement, jazz nightclubs were among the first places that opened their doors to both Black and white performers and club goers in Jim Crow America. In this extraordinary collection, Jeff Gold looks back at this explosive moment in the history of Jazz and American culture, and the spaces at the center of artistic and social change. *Sittin' In* is a visual history of jazz clubs during these crucial decades when some of the greatest names in the genre—Billie Holiday, Charlie Parker, Ella Fitzgerald, Dizzy Gillespie, Miles Davis, Louis Armstrong, Oscar Peterson, and many others—were headlining acts across the country. In many of the clubs, Black and white musicians played together and more significantly, people of all races gathered together to enjoy an evening's entertainment. House photographers roamed the floor and for a dollar, took picture of patrons that were developed on site and could be taken home in a keepsake folder with the club's name and logo. *Sittin' In* tells the story of the most popular club in these cities through striking images, first-hand anecdotes, true tales about the musicians who performed their unforgettable shows, notes on important music recorded live there, and more. All of this is supplemented by colorful club memorabilia, including posters, handbills, menus, branded matchbooks, and more. Inside you'll also find exclusive, in-depth interviews conducted specifically for this book with the legendary Quincy Jones; jazz great tenor saxophonist Sonny Rollins; Pulitzer Prize-winning fashion critic Robin Givhan; jazz musician and creative director of the Kennedy Center, Jason Moran; and jazz critic Dan Morgenstern. Gold surveys America's jazz scene and its intersection with racism during segregation, focusing on three crucial regions: the East Coast (New York, Atlantic City, Boston, Washington, D.C.); the Midwest (Chicago, Cleveland, Detroit, St. Louis, Kansas City); and the West Coast (Los Angeles, San Francisco). This collection of ephemeral snapshots tells the story of an era that helped transform American life, beginning the move from traditional Dixieland jazz to bebop, from conservatism to the push for personal freedom.

And when the Black Cat whips him up a homemade version of his ebony ensemble, Spidey can embrace a modern look that only looks killer. But while Peter thinks he's done with his rather clingy former suit, the sinister symbiote isn't finished with him. Collects *Marvel Team-Up* (1972) #146-150; *Peter Parker, the Spectacular Spider-Man* (1976) #96-100, Annual #4; *Amazing Spider-Man* (1963) #259-263; *Web of Spider-Man* (1985) #1.

The Last Checkmate Gabriella Saab 2021-10-19 A PopSugar Best Book of the Year! Readers of Heather Morris's *The Tattooist of Auschwitz* and watchers of *The Queen's Gambit* won't want to miss this amazing debut set during World War II. A young Polish resistance worker, imprisoned in Auschwitz as a political prisoner, plays chess in exchange for her life, and in doing so fights to bring the man who destroyed her family to justice. Maria Florowska is many things: daughter, avid chess player, and, as a member of the Polish underground resistance in Nazi-occupied Warsaw, a young woman brave beyond her years. Captured by the Gestapo, she is imprisoned in Auschwitz, but while her family is sent to their deaths, she is spared. Realizing her ability to play chess, the sadistic camp deputy, Karl Fritsch, decides to use her as a chess opponent to entertain the camp guards. However, once he tires of exploiting her skills, he has every intention of killing her. Befriended by a Catholic priest, Maria attempts to overcome her grief, vows to avenge the murder of her family, and plays for her life. For four grueling years, her strategy is simple: Live. Fight. Survive. By cleverly provoking Fritsch's volatile nature in front of his superiors, Maria intends to orchestrate his downfall. Only then will she have a chance to evade the fate awaiting her and see him punished for his wickedness. As she carries out her plan and the war nears its end, she challenges her former nemesis to one final game, certain to end in life or death, in failure or justice. If Maria can bear to face Fritsch—and her past—one last time.

Happy by Design Ben Channon 2019-07-15 Can good design truly make us happier? Given that we spend over 80% of our time in buildings, shouldn't we have a better understanding of how they make us feel? This book explores the ways in which buildings, spaces and cities affect our moods. It reveals how architecture and design can make us happy and support mental health and explains how poor design can have the opposite effect. Presented through a series of easy-to-understand design tips and accompanied by beautiful diagrams and illustrations, *Happy by Design* is a fantastic resource for architects, designers and students, or for anybody who would like to better understand the relationship between buildings and happiness.

Fracking Pennsylvania Walter Brasch 2014-02 --70% more content than first edition --updated to 2014 --30 photos and graphics In his most powerful investigation to date, award-winning journalist Walter M. Brasch digs into the natural gas industry and extracts the truth about fracking. This is the long-awaited second edition to the critically-acclaimed first edition that explored all aspects of the controversies surrounding fracking. Hydraulic horizontal fracturing, better known as fracking, is the process of injecting as much as seven million gallons of water, proppants (like silica sand), and toxins into the earth to fracture the shale and extract methane. Politicians want natural gas drillers to come into their states, primarily because of the numbers of well-paying jobs the industry creates, the overall economic benefits, and the lower costs of natural gas to the consumer. Dr. Brasch investigates those claims, and provides an extensive look at the money trail between the industry and the politicians' campaign receipts. Combining both scientific evidence and extensive interviews with those affected by fracking throughout the country, he concludes that errors made by the natural gas industry as well as the process itself have caused significant public health and the environmental problems that also affect agriculture, wildlife, and livestock.

A Lost Man Abdul Rehman 2022-02-14 The story is about a boy who had lived his life being deviant. The disturbed boy did everything which will create hate for him but instead he was liked by everyone. That boy was different from others from the start of his birth. He did a lot of wrongdoings throughout his life and in addition to that he was caught up in a love affair too.

The Fluoride Deception Christopher Bryson 2011-01-04 With the narrative punch of Jonathan Harr's *A Civil Action* and the commitment to environmental truth-telling of Erin Brockovich, *The Fluoride Deception* documents a powerful connection between big corporations, the U.S. military, and the historic reassurances of fluoride safety provided by the nation's public health establishment. The *Fluoride Deception* reads like a thriller, but one supported by two hundred pages of source notes, years of investigative reporting, scores of scientist interviews, and archival research in places such as the newly opened files of the Manhattan Project and the Atomic Energy Commission. The book is nothing less than an exhumation of one of the great secret narratives of the industrial era: how a grim workplace poison and the most damaging environmental pollutant of the cold war was added to our drinking water and toothpaste.

No Accident Neil Arason 2014-04-29 It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. *No Accident* examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based

sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.
